“We had never built a house before. When we walked into Sharon’s office, we were very impressed by the fact that the pictures in her portfolio were all so different. Each home had its own look and feel. Sharon is truly gifted; she is able to capture an individual’s personality and lifestyle and incorporate that into the design. She asks lots of questions and learns how you want to live in your home. The decision to have yellow tones throughout our home was a result of Sharon asking what colors make me feel good. We love our home and have had Sharon design two additional properties for us.”

Our design team approaches each project with superior personal service, cultivating a rewarding and unique design experience for our clients.

Montanna & Associates revels in our clients’ individual tastes and lifestyle needs while giving rise to world-class interior design and architectural detailing.
